## Testimonial

Dr. Vincent Considine of Vee Solutions Ltd.

### To whom it may concern

Meggitt plc has grown very rapidly through acquisition in recent years and by early 2010 was a group spanning some 35 sites in Europe, the Americas and the far east. The very varied nature of the constituent businesses meant that Meggitt's development and delivery programmes were managed in a wide variety of different ways. There was a clear need to achieve a consistent way of managing programmes. The implementation of Programme Lifecycle Management (PLM) has become paramount to help us achieve a common standardized processes to execute programmes across Meggitt.

Dr. Vincent Considine of Vee Solutions Ltd was asked to support Meggitt in the capacity of Group Lifecycle Manager tasked with introducing a consistent way of managing programmes across the whole of the Meggitt group. His views and execution plans for PLM were highly respected and well supported by Meggitt.

I met with Vincent in my capacity of Vice President of Programs for Meggitt Control Systems (MCS) based in North Hollywood California where we worked together in various workshops to define a Programme Lifecycle Management (PLM) scheme suitable for deployment across the various businesses in the group. We jointly presented multiple training events for the MCS executive team and for program management practitioners across multiple sites in the US. Dr. Considine's professionalism, sincerity, devotion and hands-on in this development became highly commendable by many leaders across Meggitt because, as a consultant, his unique hands-on work habit in strategizing, developing, documenting the processes and training employees has liberated many of

# MEGGITT

us from the burden of this development and hence allowing us to go on with our day to day business activities.

Dr. Considine was instrumental in driving the development of PLM suitable for all of Meggitt. He worked with the individual businesses to deliver training tailored to our specific needs while remaining consistent with the corporate PLM ideal. He consistently demonstrated excellent work habits and we supported him pleasurably as we harvested a valuable education.

Dr. Considine has been a great asset to us and to further utilize his expertise, I recommended to my seniors to extend his contract with Meggitt so that we can broaden and strengthen our education in earned value, and risk management.

My experience with Dr. Considine has provided me with a clear conscience and confidence to highly recommend him as an expert in his field.

Yours sincerely

**Toni Malek**
